Gurgaon Residential Market Intelligence & Opportunity Analytics

PROJECT OVERVIEW

This project analyzes Gurgaon's residential sales and rental markets to evaluate pricing patterns, inventory distribution, buyer opportunities, and rental market dynamics across localities and property segments.

The dashboard integrates custom market segmentation frameworks, buyer value assessment models, pricing intelligence, and rental analytics to support residential market evaluation, investment decisions, and value-driven property discovery.

BUSINESS OBJECTIVES

- Analyze residential pricing, inventory concentration, and market composition.
- Identify buyer opportunities using Market Tier, Home Size, Buyer Value, and Rental Value segmentation frameworks.
- Evaluate pricing efficiency through property price, price per sq.ft, home size, and locality-level market comparisons.
- Assess residential sales and rental markets to uncover value-driven buying, renting, and investment opportunities.
- Compare market behavior across property types, BHK configurations, pricing segments, and rental categories.
- Support data-driven residential market analysis for buyers, investors, developers, and real estate decision-makers.

DASHBOARD STRUCTURE

01 Gurgaon Residential Market Overview

Understand overall market landscape, pricing trends, inventory levels, and locality performance metrics.

02 Gurgaon Buyer Value & Opportunity Intelligence

Discover high-value buyer segments, property opportunities, and investment potential across Gurgaon.

03 Gurgaon Rental Market & Opportunity Intelligence

Explore rental market performance, rent trends, budget tiers, and high demand rental segments.

04 Segmentation Framework & Business Definitions

Review segmentation frameworks, key definitions, and methodologies used for market analysis.

SEGMENTATION FRAMEWORK & BUSINESS DEFINITIONS

METHODOLOGY

Market Tier, Size Tier, and Value Position frameworks were developed using property price distribution, home area segmentation, and median-based benchmarking. Thresholds were established through distribution analysis and business interpretation to create meaningful market segments that support residential market evaluation, buyer opportunity identification, pricing analysis, and property comparison.

RESIDENTIAL MARKET SEGMENTATION

Frameworks to analyze Gurgaon's for-sale residential market across pricing, size, and buyer value perspectives.

MARKET TIER FRAMEWORK

MARKET TIER

Segment	Property Price (₹)
Entry Market	Below ₹1.5 Cr
Mid Market	₹1.5 Cr – ₹3 Cr
Premium Market	₹3 Cr – ₹6 Cr
Luxury Market	₹6 Cr – ₹10 Cr
Ultra Luxury	Above ₹10 Cr

ANALYTICAL APPLICATIONS

- Standardizes the residential market into meaningful price segments.
- Supports pricing comparison across localities and property types.
- Enables inventory concentration and market composition analysis.

HOME SIZE FRAMEWORK

HOME SIZE TIER

Segment	Area (Sq.Ft.)
Small Homes	Below 1,500
Mid-Size Homes	1,500 – 2,499
Large Homes	2,500 – 3,999
Expansive Homes	4,000+

ANALYTICAL APPLICATIONS

- Standardizes residential properties by usable living space.
- Supports inventory analysis across different home sizes.
- Enables price-per-square-foot comparisons by size category.

BUYER VALUE FRAMEWORK

VALUE POSITION

Segment	Business Definition
Budget Friendly	Lower Price + Smaller Area
Value Opportunity	Lower Price + Larger Area
Premium Priced	Higher Price + Smaller Area
Premium Asset	Higher Price + Larger Area

ANALYTICAL APPLICATIONS

- Identifies properties offering stronger value relative to market benchmarks.
- Distinguishes between affordable, value-driven, premium-priced, and luxury assets.
- Supports buyer opportunity analysis across different market segments.

RENTAL MARKET SEGMENTATION

Frameworks to analyze Gurgaon's rental market across rent bands, home size, and value positioning for tenant insights.

RENTAL BUDGET TIER FRAMEWORK

RENTAL BUDGET TIER

Segment	Monthly Rent (₹)
Budget Rental	Below ₹30,000
Mid Rental	₹30,000 – ₹50,000
Premium Rental	₹50,000 – ₹75,000
Luxury Rental	Above ₹75,000

ANALYTICAL APPLICATIONS

- Standardizes rental market into meaningful rent band segments.
- Supports rent trend and affordability analysis.
- Enables inventory distribution and concentration tracking.

RENTAL SIZE TIER FRAMEWORK

RENTAL SIZE TIER

Segment	Area (Sq.Ft.)
Small Homes	Below 1,500
Mid-Size Homes	1,500 – 2,499
Large Homes	2,500 – 3,999
Expansive Homes	4,000+

ANALYTICAL APPLICATIONS

- Standardizes rental homes by usable living space.
- Supports inventory analysis across different size categories.
- Enables rent-per-square-foot comparisons by size category.

RENTAL VALUE POSITION FRAMEWORK

RENTAL VALUE POSITION

Segment	Business Definition
Budget Rental	Rent ≤ Median Rent + Area ≤ Median Area
Value Rental	Rent ≤ Median Rent + Area > Median Area
Premium Rental	Rent > Median Rent + Area ≤ Median Area
Luxury Rental	Rent > Median Rent + Area > Median Area

ANALYTICAL APPLICATIONS

- Identifies rental properties offering better value relative to market medians.
- Distinguishes between affordable, value-driven, premium, and luxury rentals.
- Supports tenant opportunity analysis across rental segments.
